## INTRODUCTION

Use FOS Manuals for Reference

Use Technical Manuals for Actual Service

This technical manual is part of a twin concept of service:

- **FOS Manuals—for reference**
- **Technical Manuals—for actual service**

The two kinds of manuals work as a team to give you both the general background and technical details of shop service.

*Fundamentals of Service (FOS) Manuals* cover basic theory of operation, *fundamentals* of trouble shooting, *general* maintenance, and *basic* types of failures and their causes. FOS Manuals are for training new men and for reference by experienced men.

*Technical Manuals* are concise service guides for a *specific* machine. Technical Manuals are on-the-job guides containing only the vital information needed by a journeyman mechanic.

When a serviceman should refer to a FOS Manual for more information, a FOS symbol like the one at the left is used in the TM to identify the reference.

Some features of this technical manual:

- *Table of contents at front of manual*
- *Exploded views showing parts relationship*
- *Photos showing service techniques*
- *Specifications grouped for easy reference*

This technical manual was planned and written for you—a journeyman mechanic. Keep it in a permanent binder in the shop where it is handy. Refer to it whenever in doubt about correct service procedures or specifications.

Using the technical manual as a guide will reduce error and costly delay. It will also assure you the best in finished service work.

This safety alert symbol identifies important safety messages in this manual. When you see this symbol, be alert to the possibility of personal injury and carefully read the message that follows.

## Group 5 SPECIFICATIONS

<b>HORSEPOWER*</b> (at 2,200 engine rpm):	<b>SAE</b>	<b>PS</b>
Gross .....	141	143
Net .....	131	133

\* Net engine flywheel horsepower is for an engine equipped with fan, air cleaner, water pump, lubricating oil pump, fuel pump, alternator, and muffler. The gross engine horsepower is without fan. Gross and net flywheel horsepower ratings are under SAE standard conditions of 500-ft. altitude and 85°F. temperature and DIN 70 020 (non-corrected). Engine maintains rated horsepower up to 10,000 feet (3,000 m) altitude.

**ENGINE:**

John Deere Diesel, vertical 6-cylinder, valve-in-head, 4-stroke cycle—turbo-built with turbocharger.  
 Bore and stroke ..... 4.25x4.75 in. (108x121 mm)  
 Piston displacement ..... 404 cu. in. (6620 cm)  
 Compression ratio ..... 16.5 to 1  
 Maximum torque @ 1,600 rpm ..... 348 lb-ft. (48, 1 kg-m)  
 N.A.C.C. or A.M.A. (U.S. Tax) horsepower ..... 43.3  
 Lubrication ..... Pressure system with full-flow filter  
 Cooling ..... Pressurized with thermostat and fixed bypass  
 Fan ..... Suction-type  
 Air cleaner ... Dry type, dual element with restriction indicator  
 Lights and starting system ..... 12-volt with alternator  
 Batteries, two ..... Reserve capacity: 180 minutes each

**TRANSMISSION:**

Twin-turbine torque converter with Power-Shift transmission (4 speeds forward—2 reverse).

**TORQUE MULTIPLICATION RATIO** ..... 3.2 to 1

**DIFFERENTIALS:**

Front ..... "No-Spin" type  
 Rear ..... Standard

**DRIVE AXLES:**

4-wheel drive with inboard-mounted planetary gears to each wheel. Front axle fixed. Rear axle oscillates 22-degree total. 15.3 in. (339 mm) vertical travel at center of tire.

**RECOMMENDED TRAVEL SPEEDS:**

Forward and reverse ..... 4.5 mph maximum

**BRAKES:**

Service...Power actuated, 4-wheel, inboard-mounted wet disk. Foot-operated by either right or left pedal.  
 Parking...10x1.5-in. (254x38 mm) expanding shoe type on transmission output shaft. Adjustable, hand operated with warning light on dash.

**STEERING:**

Full power steering. Frame articulated 80 degrees by two hydraulic cylinders. Vehicle clearance circle is 36 ft. 10.8 in. (11,25 m).

**HYDRAULIC SYSTEMS:**

Loader functions system...Live, transmission-driven, vane-type pump delivers 60 gpm (227 lpm) at 2,200 engine rpm and 2,250 psi (158,2 kg/cm<sup>2</sup>) relief-valve pressure setting.

Control .....Dual-lever, triple hydraulic system. bucket.

Steering and brake systems...Engine-driven, eight-piston, variable-displacement-type pump delivers 26 gpm (98 lpm) at 2,200 engine rpm and 2,250 psi (158.2 kg/cm<sup>2</sup>).

**LANDFILL BUCKETS:**

	<b>Capacity</b>	<b>Width</b>
Refuse ..... Dirt:	2-3/4 cu. yd. (2,10 m <sup>3</sup> )	110.77 in. (2,81 m)
..... Refuse:	4-1/2 cu. yd. (3,44 m <sup>3</sup> )	
Light materials .....	4-1/2 cu. yd. (3,44 m <sup>3</sup> )	110.77 in. (2,81 m)
Multi-purpose ..... Dirt:	2/1/4 cu. yd. (1,72 m <sup>3</sup> )	106.4 in. (2,70 m)
..... Refuse:	3-1/2 cu. yd. (2,68 m <sup>3</sup> )	

**COMPACTOR WHEELS:**

Width ..... 23 in. (584 mm)  
 Diameter ..... 55 in. (1397 mm)  
 60° cleats, 32/wheel ..... 5 in. (127 mm)  
 Encased General tires ..... 13-24, 12 pr  
 Compaction ..... Up to 2,898 psi

**WHEEL TREADS AND WIDTH:**

Front and rear (center-to-center) ..... 81.5 in. (2,07 m)  
 Width outside wheels ..... 104.5 in. (2,65 m)

**CAPACITIES:**

	<b>U.S.</b>	<b>Liters</b>
Cooling system .....	9 gal.	34,1
Fuel tank .....	50 gal.	189,3
Crankcase and filter .....	17 qt.	16,1
Transmission case and filters .....	9.75 gal.	36,9
Front differential .....	6 gal.	22,7
Rear differential .....	6.5 gal.	24,6
Loader hydraulic sump .....	17.5 gal.	66,2

**OPERATING WEIGHT:**

	<b>lb.</b>	<b>kg</b>
With refuse bucket .....	30,012	13625
With multi-purpose bucket .....	30,282	13747

**ADDITIONAL STANDARD EQUIPMENT:**

- Adjustable cushioned seat
- Engine side shields
- Key switch
- Cigaret lighter
- Vandal protection
- Horn
- Automatic return-to-dig
- Fixed drawbar
- Vertical exhaust w/rain cap
- Hand grips
- Electric hour meter
- Ether starting aid
- Heater for cab
- Defroster
- Fire extinguisher
- Radiator screen
- Push button safety start
- ROPS cab and seat belt

**SPECIAL EQUIPMENT:**

- Pre-cleaner
- Multi-purpose refuse bucket:
  - 2-1/4 yd. dirt capacity, 3-1/2 yd. refuse capacity
- Light-materials bucket:
  - 4-1/2 yd. capacity

(Specifications and design are subject to change without notice. Wherever applicable, specifications are in accordance with IEMC and SAE Standards. Except where otherwise noted, these specifications are based on a unit equipped with demolition wheels; refuse bucket, and standard equipment.)

## Group 10

# PREDELIVERY, DELIVERY AND AFTER-SALE SERVICES

### PREDELIVERY SERVICE

Because of the shipping factors involved, plus extra finishing touches that are necessary to promote customer satisfaction, proper delivery service is of prime importance to the dealer.

A tag pointing out the factory-recommended procedure for predelivery service is attached to each new compactor before it leaves the factory.

After completing the factory-recommended dealer checks and services listed on the predelivery tag, remove the tag from the compactor and file it with the shop order for the job. The tag will then serve as a basis for certifying that the compactor has received the proper predelivery service when that portion of the customer's John Deere Delivery Receipt is completed.

### TEMPORARY COMPACTOR STORAGE

Service	Specification	Reference
Check radiator for coolant loss and antifreeze protection	Bottom of filler neck	.....
Reduce shipping pressure of tires	.....	Operator's Manual
Cover compactor for protection and cleanliness	.....	.....

### PREDELIVERY INSPECTION

#### COOLING SYSTEM

Inspect radiator for coolant loss	Bottom of filler neck	.....
Check antifreeze protection	.....	.....

#### ELECTRICAL SYSTEM

Check battery terminals to be sure they are tight	.....	.....
Remove brake fuse from spare fuse holder and insert into fuse block. Test lights	.....	Section 40, Group 10

#### TIRES AND WHEELS

Adjust tire pressure	70 psi	Operator's manual
Check all wheel retainers for tightness	275 ft-lbs torque	Operator's manual

**PREDELIVERY INSPECTION—Continued**

Service	Specification	Reference
<b>LUBRICATION</b>		
Check crankcase oil level	To top mark on dipstick	Operator's manual
Compactor hydraulic system oil level	Check oil level at window (JD303 Special-Purpose Oil)	Operator's manual
Check oil level in front and rear differentials	To level of check plug (cold) (JD303 Special-Purpose Oil)	Operator's manual
Check transmission oil level	To top mark on dipstick (J.D. Torque-Converter Fluid Type C-2)	Operator's manual
Lubricate grease fittings	John Deere Multi-Purpose Lubricant or an equivalent	Operator's manual
<b>ENGINE</b>		
Check air cleaner	.....	Operator's manual
Fill fuel tank and start engine	50 U.S. gallons	Operator's manual
Check operation of lights, gauges and indicator lights	.....	Operator's manual
Check speed control linkage	.....	Section 20, Group 20
Check engine speeds	.....	Section 20, Group 20
<b>OPERATION</b>		
Shift transmission through all ranges	.....	Operator's manual
Check hydraulic system operation	.....	Section 70, Group 5
Check clutch cutoff control disconnect	.....	Section 60, Group 5
Check rear axle disconnect operation	.....	Section 50, Group 15
Check fire extinguisher	.....	Operator's manual
Check brake operation	.....	Section 60, Group 5
Check steering operation	.....	Section 60, Group 5
Check seat operation	.....	Operator's manual
<b>GENERAL</b>		
Tighten accessible nuts and cap screws	.....	.....
Clean compactor and touch up paint	.....	.....

### DELIVERY SERVICE

A thorough discussion of the operation and service of a new compactor at the time of delivery helps to assure customer satisfaction. Proper delivery should be an important phase of a dealer's program. A portion of the John Deere Delivery Receipt emphasizes the importance of proper delivery service.

It is a well-known fact that many complaints have arisen simply because the owner was not shown how to operate and service his new unit properly. Devote enough time, at the customer's convenience, to introduce the owner to his new compactor and explain to him how to operate and service it.

The following procedure is recommended before the service man and the owner complete the delivery acknowledgments portion of the delivery receipt.

Using the compactor operator's manual as a guide, be sure that the owner understands these points thoroughly:

1. The importance of safety.
2. The importance of lubrication and periodic services.
3. Controls and Instruments.
4. How to start and stop the engine.
5. The importance of the break-in period.
6. All functions of the hydraulic system.

After explaining and demonstrating the above features, have the owner sign the delivery receipt and give him the operator's manual.

### AFTER-SALE SERVICE

The purchaser of a new John Deere compactor is entitled to a free inspection at some mutually agreeable time within the warranty period after the equipment has been "run in." The terms of this after-sale inspection are outlined on the back of the customer's John Deere delivery receipt.

The purpose of this inspection is to make sure that the customer is receiving satisfactory performance from his compactor. At the same time, the inspection should reveal whether or not the compactor is being operated, lubricated, and serviced properly.

If the recommended after-sale service inspection is followed, the dealer can eliminate a needless volume of service work by preventing minor irregularities from developing into serious problems later on. This will promote strong dealer - customer relations and present the dealer an opportunity to answer questions that may have arisen during the first few days of operation. During the inspection service, the dealer has the further opportunity of promoting the possible sale of other new equipment.

### AFTER-SALE INSPECTION

Service	Specification	Reference
<b>COOLING SYSTEM</b>		
Check radiator coolant level	Bottom of filler neck	.....
Check hoses and connections for leaks	.....	.....
<b>FUEL SYSTEM</b>		
Bleed fuel system	.....	Operator's manual

**AFTER-SALE INSPECTION—Continued**

Service	Specification	Reference
Check fuel line connections	.....	.....
Check air cleaner element and unloading valve. Clean element if necessary	.....	Operator's manual
<b>ELECTRICAL SYSTEM</b>		
Check specific gravity of batteries	Full charge - 1.260 at 80°F	Operator's manual
Check level of battery electrolyte	To bottom of filler neck in each cell	Operator's manual
Check alternator belt tension	75 to 85 lbs. tension (measured on a test gauge). After 3 minutes of operation, tension should be 60 lbs. minimum	Operator's manual
Check fan belt tension	110 to 110 lbs. tension (measured on a test gauge). After 3 minutes of operation, tension should be 80 lbs. minimum	Operator's manual
Start engine and check action of starter, lights, and indicator lamps	.....	Operator's manual
<b>LUBRICATION</b>		
Check engine crankcase oil level	To top mark on dipstick	Operator's manual
Check transmission oil level	To top mark on dipstick (J.D. Torque Converter Fluid Type C-2)	Operator's manual
Check hydraulic system oil level	Check oil level at window (JD303 Special-Purpose Oil)	Operator's manual
Check oil levels in front and rear differentials	To level of check plug (Cold oil) (JD303 Special-Purpose Oil)	Operator's manual

### AFTER-SALE INSPECTION—Continued

Service	Specification	Reference
<b>ENGINE</b>		
Check engine valve tappet clearance	Intake - 0.018-inch Exhaust - 0.022-inch	Section 20, Group 10
<b>CONTROLS</b>		
Check clutch cutoff	.....	Section 50, Group 15
Check return-to-dig valve operation	Check oil level and adjust (JD303 Special-Purpose Oil)	Operator's manual
<b>HYDRAULIC SYSTEM</b>		
Check power steering	.....	Section 60, Group 5
Check power brakes	Less than 2 inches of travel	Operator's manual
Check brake accumulator	20 brake pedal applications with engine stopped	Section 60, Group 5
<b>GENERAL</b>		
Check fire extinguisher	.....	Operator's manual
Check tire pressure	70 psi	Operator's manual
Check wheel retainers for tightness	275 ft-lbs torque	Operator's manual
Clean out radiator screen	.....	Operator's manual
